CONSERVATION REPORT CARD

EVALUATING THE 118TH CONGRESS

Defenders of Wildlife is a national, nonprofit membership organization dedicated to the protection of all native animals and plants in their natural communities. Defenders' approach to conservation is direct and straightforward: We protect and restore imperiled species throughout North America by transforming policies and institutions and promoting innovative solutions. Informed by scientific, legal and policy expertise, hands-on wildlife management experience and effective advocacy, we strive to make a lasting difference for wildlife and its habitat in these uniquely challenging times.

Defenders engages in vigorous congressional advocacy efforts in support of our mission. We express our views on legislation affecting wildlife and public lands, work to achieve acceptable pro-wildlife and habitat outcomes, and grade lawmakers on their votes in our annual conservation report cards.

Defenders of Wildlife's *2024 Conservation Report Card* measures the commitment of U.S. senators and representatives to wildlife and habitat conservation during the two sessions of the 118th Congress. It tells you at a glance whether your elected representatives are preserving America's natural heritage for our children and grandchildren in the various votes they are casting.

This report card reviews fifteen House votes and four Senate votes with serious implications for wildlife, habitat and the environment. In 2023, the House and Senate approved resolutions under the Congressional Review Act (CRA) that would have revoked recent actions by U.S. Fish and Wildlife Service (FWS) to establish new Endangered Species Act (ESA) protections for imperiled species including the lesser prairie chicken and the northern long-eared bat. While Congress narrowly approved these measures, they were subsequently vetoed by President Biden and did not become law. In 2024, the House attempted to overturn the landmark BLM Conservation Rule. While the House approved the CRA resolution, the Senate did not vote on the measure. The House also approved legislation billed as a wildfire risk measure but which in fact was primarily intended to boost logging and weaken protections under the National Environmental Policy Act and the Endangered Species Act.

Other 2024 House votes include the passage of an FY25 Interior funding bill that, for the second straight year, was loaded with anti-ESA provisions and funding cuts to wildlife programs. One bright spot was the rejection, for the second year in a row, of an amendment to essentially exempt the Defense Department from the Endangered Species Act.
