

**Comparison of Key Conservation Measures in Existing and Proposed
Bureau of Land Management Greater Sage-Grouse Conservation Plans**

Key Conservation Measures by BLM Sub-Regional Plan	Colorado		Idaho		Oregon		Nevada/ NE California		Utah		Wyoming		Montana	North Dakota	South Dakota
	2015	2018	2015	2018	2015	2018	2015	2018	2015	2018	2015	2018	2015	2015	2015
Protects Sage-Grouse Strongholds															
Protects Breeding, Nesting and Brood-Rearing Habitats															
Limits Disturbance from Development in Priority Habitat															
Limits Density of Development in Priority Habitat															
Requires Common Sense Fluid Mineral Development															
Supports Science-Based Vegetation Management															
Restricts Disposal of Sage-Grouse Habitat on Public Lands															

Adopted conservation measure based on the best available science and informed by management experience.

Partially adopted conservation measure, i.e., does not make it mandatory, defers application to future, project-level planning or allows for needless exceptions, waiver or modification of the measure.

Did not adopt conservation measure based on the best available science and informed by management experience.

Plan not proposed for amendment.
